

# INJURY EXTRA

## Instructions to Authors

**Description:** *Injury Extra* is the free online only companion journal to *Injury* and publishes abstracts, case reports and some original articles. All articles are peer reviewed to the same high standards of *Injury*, fully citable through digital object identifiers (DOI) and free and instantly available through the web address: [intl.elsevierhealth.com/journals/inju](http://intl.elsevierhealth.com/journals/inju)

### Submission of Manuscripts

Authors should submit three (3) hardcopies of their paper although wherever possible, electronic manuscripts only may be submitted in *double-spaced* typing, by E-Mail as an attachment in Word with the tables, figures and illustrations in Word, PowerPoint or as JPEG files.

Whether hard copy or electronic it is important that the paper is accompanied by a letter/E-Mail message indicating the name, address, phone number, fax number, and E-Mail of the corresponding author and a statement that all authors have contributed to, and read, the paper and have given permission for their name to be included as a co-author. The letter/E-Mail must also confirm that the manuscript has not been published and will not be submitted simultaneously or published elsewhere. If any illustrations, diagram or part of the text have been published elsewhere the source must be given in full, permission by having been granted by the author and the publisher. A separate covering letter, signed by the corresponding author on behalf of all the named authors, affirming their contribution to and responsibility for the paper, should also be sent by regular mail or fax.

When a manuscript is accepted we require a hard copy and electronic version which must match the hard copy exactly. Always keep a backup copy of the electronic file for reference and safety. Label storage media with your name, journal title, and software used. Save your files using the default extension of the program used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the wordprocessor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. Do not embed 'graphically designed' equations or tables, but prepare these using the wordprocessor's facility. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Author Gateway's Quickguide: <http://authors.elsevier.com>). Do not import the figures into the text file but, instead, indicate their approximate locations directly in the electronic text and on the manuscript. To avoid unnecessary errors you are strongly

advised to use the 'spellchecker' function of your wordprocessor. No changes to the accepted version are permissible without the explicit approval of the Editor. Electronic files can be stored on 3½ inch diskette, ZIP-disk or CD (either MS-DOS or Macintosh).

The Editor reserves the right to make editorial and literary corrections. No major alterations or corrections will be made without the knowledge and consent of the author.

All clinical studies should contain within the text of each manuscript a statement that all experimental protocols have been approved by the Ethical Committee of the Institution. All patients, or their guardians, must have given their consent after they have received appropriate information. In the case of experimental animal studies, similar Ethical Committee approval of the protocols must have been obtained before the start of the studies.

Authors are encouraged to write concisely and the text should read easily. Unnecessary experimental detail should be avoided, but appropriate references should be given. All abbreviations should be spelled out in full the first time they are mentioned. For drugs and chemicals, the generic name should be used, but trade names may follow in brackets.

The language of the journal is English (UK), for example, haematology, anaesthetic, centre, paediatric.

All manuscripts are peer-reviewed. On receipt of the first decision letter authors should send their revised manuscript within three months in order to ensure that the scientific content of their manuscript is timely and up to date.

### Preparation of Manuscripts

**Title page:** The first page should be the title page, and must include the title of the article, names, initials and appointment of each author, name of the department(s) and institution(s) to which the work should be attributed and name, address, phone/fax and e-mail details of the author for correspondence and to whom reprints should be sent. **Please note that it is essential to include the email address of the corresponding author as proofs will be sent by email as attached PDF files.**

**Keywords:** Include up to 10 keywords.

**Abstract:** The second page should carry an abstract of not more than 200 words. It need not be formally structured, and should be easy to read, but must include the purpose of the study, basic procedures, main findings and the principal conclusions.

**Text:** This should start on the third page, and will normally be divided into the following sections: Introduction, Materials (or Patients) and Methods, Results, Discussion and Conclusions, but other descriptive headings and subheadings may be used if they are felt to be more appropriate.

The introduction should explain the purpose of the study or investigation, the clinical relevance and the background provided by previous research or publications in this area, and, where appropriate, a statement of approval by an ethics committee.

Materials (or Patients) and Methods should give details of inclusion and exclusion criteria for patients in clinical trials, research methodology, systems of assessment or measurement with appropriate references and the statistical analysis used. Any equipment or apparatus used should be named, along with the manufacturer's name and address. Sufficient detail should be given to allow other investigators to repeat the study. Where relevant, tables or figures may be included to provide information more clearly. No data should normally be presented in this section.

Results should give all the relevant data, presented in a concise and meaningful way, with tables or figures to present data more clearly or concisely where appropriate. In studies with well under 100 subjects, percentages should be avoided.

Discussion should consider the results and possible confounding factors, sources of bias, weaknesses in the study, and a review of the relevant literature, putting the results of the study in the context of previous work in this area.

Conclusions must be based on the results presented.

**Tables:** Each Table, with an appropriately brief title, should be numbered and printed on a separate page. No vertical lines should be used. All tables should be referred to by number in the text.

**Figures:** Figures must be clearly numbered. Photographic illustrations should be submitted in the form of good quality prints (not negatives or 0 slides), approximately 12 cm × 18 cm (5" × 7"). On the back of these, on a sticky label, should be an indication of orientation (Top), the figure number, running title and first author. Figures should be limited to those considered essential. Colour illustrations incur an additional cost to the author and should only be used if they illustrate important points not demonstrable in black and white. Line drawings should be professionally drawn with lettering large enough to stand reduction. A list of legends for each figure must be supplied on a separate sheet of the manuscript. Figures will not be returned after publication. All illustrations should be referred to in the text.

#### Preparation of electronic illustrations

Submitting your artwork in an electronic format helps us to produce your work to the best possible standards, ensuring accuracy, clarity and a high level of detail.

- Always supply high-quality printouts of your artwork, in case conversion of the electronic artwork is problematic.
- Make sure you use uniform lettering and sizing of your original artwork.
- Save text in illustrations as "graphics" or enclose the font.
- Only use the following fonts in your illustrations: Arial, Courier, Helvetica, Times, Symbol.
- Number the illustrations according to their sequence in the text. Use a logical naming convention for your artwork files, and supply a separate listing of the files and the software used.
- Provide all illustrations as separate files and as hardcopy printouts on separate sheets.
- Provide captions to illustrations separately.
- Produce images near to the desired size of the printed version.

Files can be stored on 3½ inch diskette, ZIP-disk or CD (either MS-DOS or Macintosh).

A detailed guide on electronic artwork is available on our website: <http://authors.elsevier.com/artwork>

**Colour Reproduction** Submit colour illustrations as original photographs, high-quality computer prints or transparencies, close to the size expected in publication, or as 35 mm slides. Polaroid colour prints are not suitable. If, **together with your accepted article, you submit usable colour figures then Elsevier will ensure, at no additional charge, that these figures will appear in colour on the web (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in colour in the printed version.** For colour reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.

Please note: Because of technical complications which can arise by converting colour figures to 'grey scale' (for the printed version should you not opt for colour in print) please submit in addition usable black and white prints corresponding to all the colour illustrations.

**References:** Authors are strongly encouraged to check the accuracy of each reference against its original source.

All references listed at the end of the article must be cited in the text. The references should be listed in the Reference section in alphabetical order and numbered in alphabetical sequence, e.g. [1] Abbott C. [2] Bader, G. [3] Brown, T. etc. References should be indicated in the text by numbers with square brackets, e.g. [1] or [3,8]. Where a reference is cited more than once in the text, the same number should be used each time. References should take the following form:

- [1] Mackay D, Wood L, Rangan A. The treatment of isolated ulnar fractures in adults: a systematic review. *Injury* 2000; 31 565–73
- [2] Richards RR, Corley FG. Fractures of the Shafts of the Radius and Ulna. In: Rockwood CA Jr, Green DP, Bucholz RW, Heckman JD. *Fractures in Adults*. 4th ed. Philadelphia: Lippincott 1996 869–928
- [3] Rockwood CA Jr, Green DP, Bucholz RW, Heckman JD. *Fractures in Adults*. 4th ed. Philadelphia: Lippincott 1996

The titles of journals should be abbreviated as in Index Medicus. If there are four or fewer authors, they should all be listed; if there are five or more, the first three authors should be listed, followed by *et al.*

Abbreviations and units of measurement should all be in SI units except for measurements of blood pressure where mm Hg is preferred. For more detailed recommendations authors should consult Baron D.N. (ed.) (1977) *Units Symbols and Abbreviations: A Guide for Biological and Medical Editors and Authors*, 3rd Ed. London, Royal Society of Medicine.

#### Supplementary data

Elsevier now accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, movies, animation sequences, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier web products, including ScienceDirect: <http://www.sciencedirect.com>. In order to ensure that your submitted material is directly usable, please ensure that data is provided in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our Author Gateway at <http://authors.elsevier.com>.

#### Enquiries

Authors can keep a track on the progress of their accepted article, and set up e-mail alerts informing them of changes to their manuscript's status, by using the "Track a Paper" feature of Elsevier's Author Gateway <http://authors.elsevier.com>. For privacy, information on each article is password-protected. The author should key in the "Our Reference" code (which is in the letter of acknowledgement sent by the publisher on receipt of the accepted article) and the name of the corresponding author. In case of problems or questions, authors may contact the Author Service Department, E-mail: [authorsupport@elsevier.com](mailto:authorsupport@elsevier.com).

#### Proofs

When your manuscript is received at the Publisher it is considered to be in its final form. Proofs are not to be regarded as 'drafts'.

One set of page proofs in PDF format will be sent by e-mail to the corresponding author, to be checked for typesetting/editing. No changes in, or additions to, the accepted (and subsequently edited) manuscript will be allowed at this stage. Proofreading is solely your responsibility.

A form with queries from the copy editor may accompany your proofs. Please answer all queries and make any corrections or additions required.

The Publisher reserves the right to proceed with publication if corrections are not communicated. Return corrections within two working days of receipt of the proofs. Should there be no corrections, please confirm this.

Elsevier will do everything possible to get your article corrected and published as quickly and accurately as possible. In order to do this we need your help. When you receive the (PDF) proof of your article for correction, it is important to ensure that all of your corrections are sent back to us in one communication. Subsequent corrections will not be possible, so please ensure your first sending is complete. Note that this does not mean you have any less time to make your corrections, just that only one set of corrections will be accepted.

**Copyright:** Authors must sign the 'Transfer of Copyright' agreement, or, where the authors work for an organisation that does not permit such assignment, a standard licence agreement, before an article can be published. This transfer agreement enables Elsevier Ltd to protect the copyright material for authors, but does not relinquish the author's proprietary rights. The copyright transfer covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or the right to adapt the article for use or in conjunction with computer systems and programs, including reproduction or publication in machine-readable form and incorporation in retrieval systems.
